DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16 and 29-42, drawn to a waveguide device, classified in class 385, subclass 37.
 - II. Claims 17-20, 43, and 44, drawn to A multiplexer or demultiplexer, classified in class 359, subclass 130
 - III. Claims 21-28, 45-48, drawn to an Optical Communications System, classified in class 359, subclass 158.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it may be patentable without the details of the optical communications system or multiplexer/demultiplexer, as indicated by evidence claim 1. The subcombination has separate utility such as for use in any optical communications system which uses a input or output function.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. If applicant should choose to elect Invention I, it contains claims directed to the following patentably distinct species of the claimed invention:
 5. This application
 - a. Species 1: Figure 3
 - b. Species 2: Figure 7
 - c. Species 3: Figure 11
 - d. Species 4: Figure 14
 - e. Species 5: Figure 16
6. If applicant should choose to elect Invention II, it contains claims directed to the following patentably distinct species of the claimed invention:
 - a. Species 1: Figure 3
 - b. Species 2: Figure 7
 - c. Species 3: Figure 20
 - d. Species 4: Figure 21
2. If applicant should choose to elect Invention III, it contains claims directed to the following patentably distinct species of the claimed invention:
 - a. Species 1: Figure 3
 - b. Species 2: Figure 7
 - c. Species 3: Figure 11
 - d. Species 4: Figure 14
 - e. Species 5: Figure 16

Art Unit: 2874

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Wong whose telephone number is 703-305-4741. The examiner can normally be reached on Monday through Friday, 830AM - 430PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rodney Bovernick can be reached on 703-308-4819. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-0725 for regular communications and 703-308-7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
